Corporate Out Reach

Ndidzulafhi Projects CC believes in giving back!

Not only do we stress exceptional service to our clients and customers, but also we strive to enrich as many lives as we can through our dedication to community service and outreach.

Learn more about some of our outreach endeavours:

1. In 2008 during our Project in Wattville Benoni we made it our mission to be community based. We not only made sure that we created an inclusive work environment which catered to the disabled people in the community, during the project we would help out families in need as well as at the end of the project we sponsored numerous families with groceries and a party to thank them for welcoming us.
2. In 2013 we were part of an outreach project with SAWIC GP in Sokhumi which falls under the City Of Tshwane region. We were part of sponsoring and building 7 houses for 7 families in need in the area.
3. In 2015 we were part of the City Of Tshwane outreach where we renovated, fully furnished and stocked up with needed supplies for an elderly man's house who was staying alone and being taken care of by his neighbours. We made sure we left him with a home that would be suitable to live in.
4. In 2018 we were part of an outreach project with SAWIC GP sponsoring and handing out food parcels to Tumelo Home in Midrand. We spent the day giving our love to the children of the home as well as trying to make even a little difference in the lives of these well deserving children.

Our vast experience in Electrical Infrastructure Development/ Construction, new installation and maintenance spans for more than 21years.

We've done streetlights installations and maintenance.

We've done new installation and maintenance of overhead lines and underground cables LV and MV Networks, we have also done level 3 cut offs whilst working for City Power.

The above experience was gained whilst working for the following municipalities.

- City of Johannesburg – City Power
- Emfuleni Municipality
- Govan Mbeki Municipality
- Eskom – Siemerpan, Germiston
- Department Of Infrastructure and development
- Department of Human Settlements

More projects have been done with City Power Johannesburg since its inception.
